

User Documentation/Manual - AVISI Recruitment Dashboard -

Created by Group 5

Welcome dear user of the AVISI recruitment dashboard! We are excited to introduce you to the functionalities and opportunities offered by this newly created recruitment dashboard. This tool was developed to make application process statistics quickly and easily accessible for you as an HR professional at AVISI.

The following document provides you with a detailed guide on:

- How to access the dashboard
- Navigating through data visualisations
- Features for dashboard adaptation

For more detailed information on system or software specifications we kindly refer you to the system documentation and the software documentation.

1. Accessing the Recruitment Dashboard

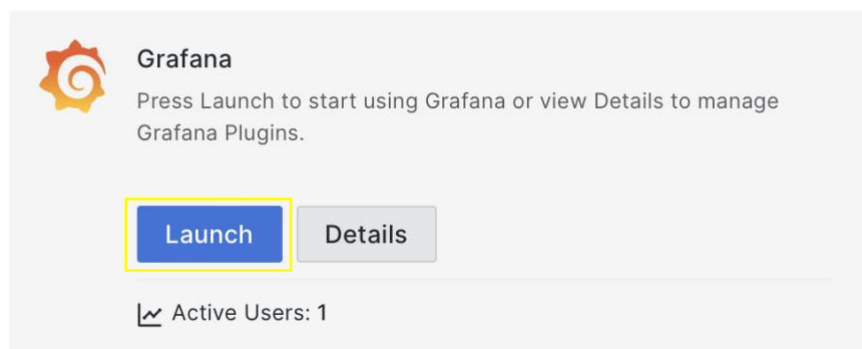

Please follow the following steps to access the recruitment dashboard:

1. In your internet browser open the link: <https://grafana.com>
2. Log in to your Grafana account
3. In the Grafana Cloud Portal scroll down until you reach the section with the heading “Manage your Grafana Cloud Stack”
4. Click on the “Launch” button located within the Grafana box (see Figure 1)
5. On the Cloud server select the “Recruitment Dashboard” listed in the left menu bar under Dashboards
6. Now the AVISI recruitment dashboard should have opened

Manage your Grafana Cloud Stack.

2. Navigating Through Different Visualisations

At the current moment the recruitment dashboard comprises of 14 visualisations that are listed in a two-column scheme, with seven visualisations listed underneath each other on the left and the other seven listed in the same way on the right side.

The different visualisations are ordered in the following way:

Average filling Time (in days)	Average Hiring Time (in days)
Vacancies per status	Applicants per Stage
Filled Vacancies	Applicants reaching stage
Number of Applicants (by month)	Number of hires (by month)
How did people find us?	Applicant process
Applicants per day	Hires per day
Number of Intern Applications (by month)	Number of interns hired (by month)

Description and Explanation of the visualised data:

Average filling Time (in days):

Average number of days it takes to fill a vacancy.

Visualisation type: Integer.

Average Hiring Time (in days):

Average number of days it takes to go from the start of the hiring process to the hired status.

Visualisation type: Integer.

Vacancies per status:

Number of vacancies per state.

Visualisation type: Horizontal bar chart with an integer presenting the total number that each bar depicts.

States:

nr_vac_open: Number of open vacancies.

nr_kdd_in_procedure: Number of vacancies in the procedure state.

nr_geen_kdd_in_procedure: Number of vacancies not in the procedure state.

closed_niet_vervuld: Numbers of vacancies closed but not filled.

closed_vervuld: Number of vacancies closed and filled.

Applicants per Stage:

Number of applicants in each stage.

Visualisation type: Horizontal bar chart with an integer presenting the total number that each bar depicts.

Stages:

open: Applicants who submitted their application and wait for the review.

beoordeling: Applicants that are being reviewed.

eerste_gesprek: Applicants who have been invited to their first interview.

tweede_gesprek: Applicants who have been invited to their second interview.

derde_gesprek: Applicants who have been invited to their third interview.

Filled Vacancies:

Percentage of vacancies that have been filled.

Visualisation type: Gauge.

Applicants reaching stage:

Percentage of applicants that reach a certain stage.

Visualisation type: Four gauges.

Gauges:

percentage_op_becoordeling: Applicants that are being reviewed.

percentage_op_eerste_gesprek: Of all applicants, the ones who are invited to the first interview.

percentage_op_tweede_gesprek: Of all applicants the ones who are invited to the second interview.

percentage_op_derde_gesprek: Of all applicants the ones who are invited to the third interview.

Number of Applications (by month):

Number of applications per month for the last twelve months.

Visualisation type: Bar chart including twelve bars.

Bar chart:

x-axis: Number of applicants

y-axis: Months

Number of hires (by month):

Number of hires taken per month for the last twelve months.

Visualisation type: Bar chart including twelve bars.

Bar chart:

x-axis: Number of applicants

y-axis: Months

How did people find us?:

Percentages of eight categories representing sources through which applicants found out about AVISI. Visualisation type: Pie chart including eight sources.

Categories:

via_recruitment_agency: Applicants who found out about AVISI through a recruitment agency.

via_network: Applicants who found out about AVISI through a recruitment agency.

other: Applicants who found out about AVISI through other sources.

via_social_media: Applicants who found out about AVISI through social media.

via_job_board: Applicants who found out about AVISI through a job board.

via_school_activity: Applicants who found out about AVISI through a school activity.

via_internship: Applicants who found out about AVISI through an internship.

via_search_engine: Applicants who found out about AVISI through a search engine.

Applicants per Stage:

Timeline of the number of applicants per stage with a total of five stages.

Visualisation type: Five Graphs.

Axes:

x-axis: Timeline in days

y-axis: Number of applicants

Graphs:

Representing the stages:

Open (white graph): Applicants who submitted their application and wait for the review.

Beoordeling (green graph): Applicants that are being reviewed.

eerste_gesprek (orange graph): Applicants who have been invited to their first interview.

tweede_gesprek (yellow graph): Applicants who have been invited to their second interview.

derde_gesprek (blue graph): Applicants who have been invited to their third interview.

Applications per day:

Number of people that apply at AVISI per day.

Visualisation type: Vertical bar chart.

Bar chart:

x-axis: Applications

y-axis: Months

Hires per day:

Number of people that are hired at a day.

Visualisation type: Vertical bar chart.

Bar chart:

x-axis: Timeline in days

y-axis: Number of hires

Number of Intern Applications (by month):

Number of interns that apply within a month for the last twelve months.

Visualisation type: Horizontal bar chart including twelve bars.

Bar chart:

x-axis: Number of applications by interns

y-axis: Months

Number of interns hired (by month):

Number of interns that are being hired within the last twelve months.

Visualisation type: Horizontal bar chart.

Bar chart:

x-axis: Number of interns hired

y-axis: Months

3. Features for Dashboard Adaptations

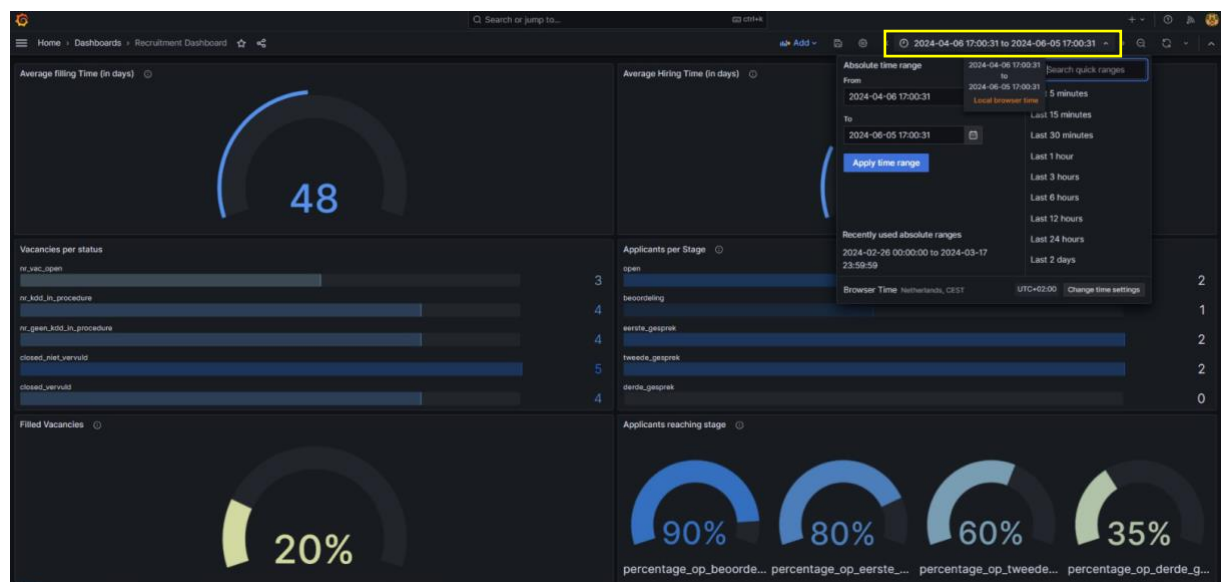

Changing the Time Range for all visualisations:

If you want to switch the range of time for which the dashboard statistics are displayed, you can do this by following these steps:

1. When in your recruitment dashboard go to the top menu bar
2. On the top right side of the menu bar select the field stating a time range (e.g., 2024-04-06 17:00:20 to 2024-06-05 17:00:20)
3. In the button menu you can either set a absolute time range on the left side or you select one of the recommended time ranges on the right side (see Figure 2)
4. You confirm your choice by selecting “Apply time range” or you can leave the menu without making any changes by clicking again on the time range button (e.g., 2024-04-06 17:00:20 to 2024-06-05 17:00:20)

Figure 2

Time range menu

Editing Visualisation Styles:

The following steps will guide you in the process of changing the style of a data visualisation:

1. Determine which visualisation you would like to change
2. Hover with your cursor over the respective visualisation field
3. In the top right corner of this field a button with three vertically oriented dots should pop up
4. Click on this button and a drop-down menu will show up
5. Click on the “Edit” button (see Figure 3)
6. You were directed to the editing menu of the selected visualisation
7. In the menu on the top right-hand side there is a button indicating the visualisation type of your visualisation (e.g., Gauge). Select that button.
8. The “Suggestions” menu opens and you can select one of these visualisation types by clicking on it (see Figure 4)
9. Another option is to click on the “Visualizations” button that is located on the left-side next to the “Suggestions” button and below the search bar, on the right-hand side of the editing menu

10. In the “Visualizations” menu you can choose between a manifold of different visualization types (e.g., Time series, Bar chart, Stat, and many more) (see Figure 5)
11. To change the visualisation style click on the preferred visualisation style for the chosen visualisation under the “Visualizations” menu.
12. To finalise and save the changed visualisation, click on the blue “Apply” button on the top right-hand side of the editing page
13. If you would like to return to the visualisation as it was before opening the editing page, click on the red “Discard” button on the top right-hand side of the editing page

Changing the order of visualisations:

To change the order of your visualisations, follow the next steps:

1. In your Grafana recruitment dashboard select one visualisation that you would like to move to another position in the dashboard and left click it with your cursor
2. Keep holding it clicked and move it to the desired location. The other visualisation field that used to be in this location will move to a side to give space for the visualisation field you move
3. You can decide to place the visualisation next to another visualisation or to put it between two rows of visualisations in the middle of a newly created row (see Figure 6)
4. Once you found a sufficient place for the visualisation loosen your left-click and drop it to the place at where it is at that moment
5. You can change your layout of visualisations anytime
